**The Confident Choir** Michael Bonshor 2017-12-06 The Confident Choir is an

exploration of conditions affecting the confidence levels in singers of all levels to create an accessible synthesis of the psychological models and offer practical confidence-building strategies for conductors, teachers, community musicians, and workshop leaders. Michael Bonshor combines his experience as a singing teacher and choral director with a series of in-depth interviews that give an intimate depiction of the challenges faced by the contemporary choral singer. These insights provide the basis for a range of suggested techniques to bolster confidence and reduce anxiety in the group-singing context. This book is primarily designed as a guide for leaders of amateur group singing activities and is relevant to choirs of all sizes and genres. The content will appeal to singers, teachers, and choir leaders; students and scholars in the fields of choral research, community music, music psychology, and adult education; and educators training the musical leaders of the future.

**Musical Pathways in Recovery** Gary Ansdell 2016-09-17 "Music triggered a healing process from within me. I started singing for the joy of

singing myself and it helped me carry my recovery beyond the state I was in before I fell ill nine years ago to a level of well-being that I haven't had perhaps for thirty years." This book explores the experiences of people who took part in a vibrant musical community for people experiencing mental health difficulties, SMART (St Mary Abbotts Rehabilitation and Training). Ansdell (a music therapist/researcher) and DeNora (a music sociologist) describe their long-term ethnographic work with this group, charting the creation and development of a unique music project that won the 2008 Royal Society for Public Health Arts and Health Award. Ansdell and DeNora track the 'musical pathways' of a series of key people within SMART, focusing on changes in health and social status over time in relation to their musical activity. The book includes the voices and perspectives of project members and develops with them a new understanding of how music promotes their health and wellbeing. A contemporary ecological understanding of 'music and change' is outlined, drawing on and further developing theory from music sociology and Community Music Therapy. This innovative book will be of interest to anyone working in the mental health field, but also music therapists, sociologists, musicologists, music educators and ethnomusicologists. This volume completes a three part 'trptych', alongside the other volumes, Music Asylums: Wellbeing Through Music in Everyday Life, and How Music Helps: In Music Therapy and Everyday Life.

**Singing the Rite to Belong** Helen Phelan 2017 This book explores the way in which singing can foster experiences of belonging through ritual performance. Based on more than two decades of ethnographic, pedagogical and musical research, it

is set against the backdrop of -the new Ireland- of the late 20th and early 21st centuries. Charting Ireland's growing multiculturalism, changing patterns of migration, the diminished influence of Catholicism, and synergies between indigenous and global forms of cultural expression, it explores rights and rites of belonging in contemporary Ireland. Helen Phelan examines a range of religious, educational, civic and community-based rituals including religious rituals of new migrant communities in -borrowed- rituals spaces; baptismal rituals in the context of the Irish citizenship referendum; rituals that mythologize the core values of an educational institution; a ritual laboratory for students of singing; and community-based festivals and performances. Her investigation peels back the physiological, emotional and cultural layers of singing to illuminate how it functions as a potential agent of belonging. Each chapter engages theoretically with one of five core characteristic of singing (resonance, somatics, performance, temporality, and tacitness) in the context of particular performed rituals. Phelan offers a persuasive proposal for ritually-framed singing as a valuable and potent tool in the creation of inclusive, creative and integrated communities of belonging.

**So You Want to Sing World Music**

Matthew Hoch 2019-11-15 In recent decades, world music styles have been making increasing inroads into Western popular music, music theater, choral concerts, and even concert hall performances. So You Want to Sing World Music is an essential compendium of these genres and provides technical approaches to singing non-Western styles. Matthew Hoch gathers a cohort of expert performers and teachers to address singing styles from across the globe,

including Tuvan throat singing, Celtic pop and traditional Irish singing, South African choral singing, Brazilian popular music genres, Hindustani classical singing, Native American vocal music, Mexican mariachi, Lithuanian sutartinės, Georgian polyphony, Egyptian vocal music, Persian āvāz, and Peking opera. Additional chapters offer resources for soloists and choral directors as well as primers on voice science, vocal health, and audio enhancement technology. The So You Want to Sing series is produced in partnership with the National Association of Teachers of Singing. **Reclaiming Late-Romantic Music** Peter Franklin 2014-02-15 Why are some of the most beloved and frequently performed works of the late-romantic period—Mahler, Delius, Debussy, Sibelius, Puccini—regarded by many critics as perhaps not quite of the first rank? Why has modernist discourse continued to brand these works as overly sentimental and emotionally self-indulgent? Peter Franklin takes a close and even-handed look at how and why late-romantic symphonies and operas steered a complex course between modernism and mass culture in the period leading up to the Second World War. The style's continuing popularity and its domination of the film music idiom (via work by composers such as Max Steiner, Erich Wolfgang Korngold, and their successors) bring late-romantic music to thousands of listeners who have never set foot in a concert hall. Reclaiming Late-Romantic Music sheds new light on these often unfairly

disparaged works and explores the historical dimension of their continuing role in the contemporary sound world.

*The Oxford Handbook of Community Music* Brydie-Leigh Bartleet 2018 This handbook provides a comprehensive review of what has been achieved in the field to date and what might be expected in the future. This handbook addresses community music through five focused lenses: contexts, transformations, politics, intersections, and education. The contributors to this handbook outline community music's common values that center on social justice, human rights, cultural democracy, participation, and hospitality from a range of different cultural contexts and perspectives.

Hip Hop Ukraine Adriana N. Helbig 2014-05-07 In Hip Hop Ukraine, we enter a world of urban music and dance competitions, hip hop parties, and recording studio culture to explore unique sites of interracial encounters among African students, African immigrants, and local populations in eastern Ukraine. Adriana N. Helbig combines ethnographic research with music, media, and policy analysis to examine how localized forms of hip hop create social and political spaces where an interracial youth culture can speak to issues of human rights and racial equality. She maps the complex trajectories of musical influence—African, Soviet, American—to show how hip hop has become a site of social protest in post-socialist society and a vehicle for social change.

Studying Congregational Music Andrew Mall 2021-02-15 Studying the role of music within religious congregations has become an increasingly complex exercise. The significant variations in musical style and content between different congregations require an

interdisciplinary methodology that enables an accurate analysis, while also allowing for nuance in interpretation. This book is the first to help scholars think through the complexities of interdisciplinary research on congregational music-making by critically examining the theories and methods used by leading scholars in the field. An international and interdisciplinary panel of contributors introduces readers to a variety of research methodologies within the emerging field of congregational music studies. Utilizing insights from fields such as communications studies, ethnomusicology, history, liturgical studies, popular music studies, religious studies, and theology, it examines and models methodologies and theoretical perspectives that are grounded in each of these disciplines. In addition, this volume presents several "key issues" to ground these interpretive frameworks in the context of congregational music studies. These include topics like diaspora, ethics, gender, and migration. This book is a new milestone in the study of music amongst congregations, detailing the very latest in best academic practice. As such, it will be of great use to scholars of religious studies, music, and theology, as well as anyone engaging in ethnomusicological studies more generally.

*The Routledge Companion to the Study of Local Musicking* Suzel A. Reily 2018-03-14 The Routledge Companion to the Study of Local Musicking provides a reference to how, cross-culturally, musicking constructs locality and how locality is constructed by the musicking that takes place within it, that is, how people engage with ideas of community and place through music. The term "musicking" has gained

currency in music studies, and refers to the diverse ways in which people engage with music, regardless of the nature of this engagement. By linking musicking to the local, this book highlights the ways in which musical practices and discourses interact with people's everyday experiences and understandings of their immediate environment, their connections and commitment to that locality, and the people who exist within it. It explores what makes local musicking "local." By viewing musicking from the perspective of where it takes place, the contributions in this collection engage with debates on the processes of musicking, identity construction, community-building and network formation, competitions and rivalries, place and space making, and local-global dynamics.

*The Oxford Handbook of Music Making and Leisure* Roger Mantie 2017-01-02 Music has been a vital part of leisure activity across time and cultures. Contemporary commodification, commercialization, and consumerism, however, have created a chasm between conceptualizations of music making and numerous realities in our world. From a broad range of perspectives and approaches, this handbook explores avocational involvement with music as an integral part of the human condition. The chapters in *The Oxford Handbook of Music Making and Leisure* present myriad ways for reconsidering and refocusing attention back on the rich, exciting, and emotionally charged ways in which people of all ages make time for making music. The contexts discussed are broadly Western, including an eclectic variety of voices from scholars across fields and disciplines, framing complex and multifaceted phenomena that may be helpfully, enlighteningly, and perhaps provocatively framed as music

making and leisure. This volume may be viewed as an attempt to reclaim music making and leisure as a serious concern for, amongst others, policy makers, scholars, and educators who perhaps risk eliding some or even most of the ways in which music - a vital part of human existence - is integrated into the everyday lives of people. As such, this handbook looks beyond the obvious, asking readers to consider anew, "What might we see when we think of music making as leisure?"

**It's All about Hymn** Donn LeVie 2008 WINNER OF THE 2011 GLOBAL eBook AWARD FOR CHRISTIAN NON-FICTION. With so many contemporary evangelical voices calling for redefining, rethinking, remaking, and repackaging Christian worship, now comes a new voice for reclaiming its sacred and traditional precepts for worshipping God through sung prayer. Praised by some of the world's leading authorities in the church music field, *It's All About HYMN: Essays on Reclaiming Sacred and Traditional Music for Worship* opens up new doors to dialogue, sheds light on factors that influence the Western Christian worship model, and challenges all Christians to reassess how they approach the act of worship. *Reclaiming Our Health* Michelle A. Gourdine 2011-04-26 "An interactive and empowering book" to help African American men and women create a new vision of better health and navigate the health care system (BET.com). According to the federal Office of Minority Health, African Americans "are affected by serious diseases and health conditions at far greater rates than other Americans." In fact, African Americans suffer an estimated 85,000 excess deaths every year from diseases we know how to prevent: heart disease, stroke, cancer, high blood pressure, and diabetes. In this important and accessible book, Dr. Michelle Gourdine provides African

Americans with the knowledge and guidance they need to take charge of their wellbeing. *Reclaiming Our Health* begins with an overview of the primary health concerns facing African Americans and explains who is at greatest risk of illness. Expanding on her career and life experiences as an African American physician, Dr. Gourdine presents key insights into the ways African American culture shapes health choices—how beliefs, traditions, and values can influence eating choices, exercise habits, and even the decision to seek medical attention. She translates extensive research into practical information and presents readers with concrete steps for achieving a healthier lifestyle, as well as strategies for navigating the health-care system. This interactive guide with illustrations is a vital resource for every African American on how to live a healthier and more empowered life, and an indispensable handbook for health-care providers, policy makers, and others working to close the health gap among people of color. Says Gourdine, "I wrote this book to empower our community to solve our own health problems and save our own lives."

*Reclaiming the Body* Lisa Vollendorf 2001 In a time when few women in Europe were educated and even fewer spoke out against the status quo, Mara de Zayas (1590-?) published novellas filled with criticism about gender relations. Her best-selling *Novelas amorosas* (1637) and *Desengaos amor*

*Reclaiming the Sacred* Raymond-Jean Frontain 1997 A thought-provoking look at the Bible! *Reclaiming the Sacred: The Bible in Gay and Lesbian Culture* explores the territory between gay/lesbian studies, literary criticism, and religious studies. This book examines the appropriation

and/or subversion of the authority of the Judeo-Christian bible by gay and lesbian writers. Two prevalent trends in gay and lesbian literature are highlighted--a transgressive approach that challenges the authority of the Bible when used as an instrument of oppression, and an appropriative technique that explores how the Bible contributes to defining gay and lesbian spirituality. *Reclaiming the Sacred* is unique in its exploration of the area between literary criticism and religious studies. Whereas contemporary literary-critical theory has been slow to integrate religion and religious history into queer theory, this pioneering journal addresses the issue with a collection of thoughtful and thought-provoking articles. Academics and lay readers interested in literary criticism, cultural studies, and religious studies will gain new insights from topics such as: sodomite rhetoric in a seventeenth-century Italian text Radclyffe Hall's lesbian messiah in her 1928 novel *The Well of Loneliness* homosexual temptation in John Milton's *Paradise Regained* Oscar Wilde's usurpation of the language of both *The Song of Songs* and *The Book of Revelation* to ape the paradox of biblical sensuality and construct an alternative identity *Reclaiming the Sacred* counteracts the manipulative and oppressive uses to which modern writers and thinkers put the Bible and the "morality" it is supposed to inscribe. An important tool for understanding the role of the Bible in gay and lesbian culture, this remarkable book makes a powerful contribution to the advancement of studies on queer sanctity.

**Music as Heritage** Barley Norton  
2018-07-20 As economic, technological and cultural change gathers pace across the world, issues of music heritage and sustainability have

become ever more pressing. Discourse on intangible cultural heritage has developed in complex ways in recent years, and musical practices have been transformed by safeguarding agendas. *Music as Heritage* takes stock of these transformations, bringing new ethnographic and historical perspectives to bear on our encounters with music heritage. The volume evaluates the cultural politics, ethics and audiovisual representation of music heritage; the methods and consequences of music transmission across national borders; and the perennial issues of revival, change and innovation. UNESCO's 2003 Convention for the Safeguarding of the Intangible Cultural Heritage provides an essential reference point for studies of music heritage. However, this volume also pays attention to important spheres of musical activity that lie outside of UNESCO's reach and the reasons why some repertoires of music are chosen for safeguarding while others are not. Some practices of art music in Europe explored in this book, for example, have received little attention despite being susceptible to endangerment. Developing a comparative framework that cuts across genre distinctions and disciplinary boundaries, *Music as Heritage* explores how music cultures are being affected by heritage discourse and the impact of international and national policies on grass-roots music practices. *The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing* Rachel Heydon  
2020-05-19 *The Routledge Companion to Interdisciplinary Studies in Singing, Volume III: Wellbeing* explores the connections between singing and health, promoting the power of singing—in public policy and in practice—in confronting health challenges across the lifespan. These

chapters shape an interdisciplinary research agenda that advances singing's theoretical, empirical, and applied contributions, providing methodologies that reflect individual and cultural diversities. Contributors assess the current state of knowledge and present opportunities for discovery in three parts: Singing and Health Singing and Cultural Understanding Singing and Intergenerational Understanding In 2009, the Social Sciences and Humanities Research Council of Canada funded a seven-year major collaborative research initiative known as Advancing Interdisciplinary Research in Singing (AIRS). Together, global researchers from a broad range of disciplines addressed three challenging questions: How does singing develop in every human being? How should singing be taught and used to teach? How does singing impact wellbeing? Across three volumes, The Routledge Companion to Interdisciplinary Studies in Singing consolidates the findings of each of these three questions, defining the current state of theory and research in the field. Volume III: Wellbeing focuses on this third question and the health benefits of singing, singing praises for its effects on wellbeing.

I am more than enough, and I am perfect with all my imperfections. In 2021, Yewande Biala wrote a searing viral essay on the debilitating effects of having your name constantly mispronounced or changed. From the incredible response to the essay, it was clear that there are still so many conversations to be had around the way that we as a society respond to each other, and the direct effect it is having on our sense of self. Reclaiming consists of interlinked essays covering a wide breadth of topics from struggling with your body image and mental health to navigating social media and dating apps without damaging your self-esteem. Each essay covers a different topic, affirming that maintaining your sense of self in a world that is not supportive of you is difficult, but not impossible. Nuanced, distinctly sharp, and full of wit, Reclaiming holds a mirror up to us all, and encourages us to like what we see.

**Who Could Ask for More?** Chris Gregory 2008 Who Could Ask For More is both an in-depth study of The Beatles' songs and an often oblique commentary on their life and times. Identifying the constant fear of an imminent nuclear holocaust as the spark for the huge social changes of the decade, Chris Gregory seeks to 'reclaim' The Beatles from the tendency to position them within a fake 'sixties nostalgia' industry. Combining analysis of their words and music with fictionalised sequences depicting key episodes in their career, the book provides a unique insight into an artistic and cultural phenomenon whose effects still resonate strongly many decades after the group broke up. The extraordinary evolution of their art is discussed in relation to the musical context of their day, with particular emphasis

on the influence of 50s rock and roll and 60s soul music.

*The Oxford Handbook of Musical Repatriation* Frank Gunderson 2019 The Oxford Handbook of Musical Repatriation is a significant edited volume that critically explores issues surrounding musical repatriation, chiefly of recordings from audiovisual archives. The Handbook provides a dynamic and richly layered collection of stories and critical questions for anyone engaged or interested in repatriation or archival work. Repatriation often is overtly guided by an ethical mandate to "return" something to where it belongs, by such means as working to provide reconnection and Indigenous control and access to cultural materials. Essential as these mandates can be, this remarkable volume reveals dimensions to repatriation beyond those which can be understood as simple acts of "giving back" or returning an archive to its "homeland." Musical repatriation can entail subjective negotiations involving living subjects, intangible elements of cultural heritage, and complex histories, situated in intersecting webs of power relations and manifold other contexts. The forty-eight expert authors of this book's thirty-eight chapters engage with multifaceted aspects of musical repatriation, situating it as a concept encompassing widely ranging modes of cultural work that can be both profoundly interdisciplinary and embedded at the core of ethnographic and historical scholarship. These authors explore a rich variety of these processes' many streams, making the volume a compelling space for critical analysis of musical repatriation and its wider significance. The Handbook presents these chapters in a way that offers numerous emergent perspectives,

depending on one's chosen trajectory through the volume. From retracing the paths of archived collections to exploring memory, performance, research goals, institutional power, curation, preservation, pedagogy and method, media and transmission, digital rights and access, policy and privilege, intellectual property, ideology, and the evolving institutional norms that have marked the preservation and ownership of musical archives-The Oxford Handbook of Musical Repatriation addresses these key topics and more in a deep, richly detailed, and diverse exploration.

*Reclaiming Calliope* Fides Krucker 2022-08-02 The practice and politics of the unfettered female voice-- reclaiming your power through voice, song, and opera-inspired exercises. For centuries, opera has used women's voices to convey male stories. Within an art form dominated by men, the female voice is a means to an end: controlled, denatured, and crafted to carry words and intentions that belie the true depth and complexity of the female experience. Here, author and opera singer Fides Krucker shows readers what it means to find--and use--our authentic voice, to sing wildly and uninhibited from the depths of our bodies and spirits. Part memoir, part radical vocal guide, and part feminist call to action, *Reclaiming Calliope* offers an intriguing look at the rarified world of opera, with fascinating behind-the-scenes details to which outsiders don't typically have access. Through incisive critique, personal stories, and intriguing exposé, Krucker razes the male gaze that packaged characters like Carmen, Tosca, and La Traviata's Violetta for viewer consumption--and radically envisions an empowered, new way of finding and fueling the authentic female voice. Through a series of breathing and

vocal prompts that anyone--not just singers--can do, Krucker helps readers reconnect to their authentic primal voices: she takes the reader inside her vocal studio to learn new methods of breath, voicework, and embodiment to uncover and access personal and social truths. Each chapter includes a theme-related exercise--an act of expression, release, self-discovery, or resistance--that guides readers to develop voices unbound from anyone else's storytelling, boldly and without apology.

Reclaiming Our Schools Edward Wynne 1997 With its hands-on focus now even more strongly emphasized, the new edition of this clearly-written, thoughtful book does an even better job of providing readers with what they need to support a program of moral education at either the elementary or secondary level. Coverage outlines the philosophical arguments for establishing classrooms and schools as sources of moral instruction, as well as exploring pertinent theories of how to accomplish this goal. The unique presentation of *Reclaiming Our Schools: Teaching Character, Academics, and Discipline* combines a comprehensive overview of theory with a complete hands-on guide to classroom techniques and schoolwide policies, thus supplying both the background and the tools needed to transform schools into sources of moral instruction. A thorough list of 100 suggestions for applying the principles within the book gives parents, teachers, and administrators a solid repertoire of ideas for use in each classroom and throughout the school. In addition, a 100-item evaluation checklist serves as a framework upon which a working character-development program may be constructed. Updated exercises within each chapter engage the reader in

contemporary situations that are both plausible and realistic. Sex and character is now examined in a separate chapter. *Reclaiming Our Schools: Teaching Character, Academics, and Discipline* is a valuable tool for any parent, teacher, administrator, school board member, or politician who wishes to learn what it takes to establish classrooms and schools as sources of moral instruction.

**Singing for Our Lives** Campaign Choirs Writing Collective 2020-07-17 The Campaign Choirs Network is a loose affiliation of like-minded choirs across the UK sharing a belief in a better world for all and dedicated to taking action by singing about it; the Campaign Choirs Writing Collective is a part of that network. The book intends to inspire the reader to engage with this world: to find out more, to join a choir in their community, to enlist their local street choir to support campaigns for social change and, more generally, to mobilize artistic creativity in progressive social movements. It is an introduction to street choirs and their history, exploring origins in and connections with other social movements, for example the Workers Education Association, the Clarion movement, Big Flame and the Social Forum movement. The book identifies the political nodes where choir histories intersect, notably Greenham Common, the Miners' Strike, anti-apartheid and Palestinian struggles. The title of the book is taken from a song by

the respected American musician and activist Holly Near, and is popular in the repertoire of many street choirs. Exploring the role of street choirs in political culture, *Singing For Our Lives* introduces this neglected world to a wider public, including activists and academics. *Singing for Our Lives* also elaborates the personal stories and experiences of people who participate in street choirs, and the unique social practices created within them. The book tells the important, if often overlooked, story of how making music can contribute to non-violent, just and sustainable social transitions. *Acting and Singing with Archetypes* Janet B. Rodgers 2009 The Mother, the Lover, the Trickster, the Spiritual and Temporal Leader, the Devil-these are just some of the universal essences, known as archetypes, that lie deep within the human spirit; these are forces that we all recognize and embody in some capacity. *Acting and Singing with Archetypes* is a groundbreaking, experiential book that uses archetypes as the basis of an unprecedented method of study for actors and singers. By using fifteen archetype explorations that employ vocal exercises, mask making, monologue and scene work, breathing exercises, role playing, storytelling, singing, meditation, self-reflection, and more, this book empowers actors to interpret character and voice in exciting, untraditional ways. The explorations ultimately leave performing artists with the tools they need to develop their theatrical roles to the fullest, utilize their singing and speech abilities with the widest range of emotion, and unlock their overall creative potential. The book also reinforces the importance of breathing, relaxing, stretching, and

other physical techniques that enable healthy practice of the craft. Geared toward theatre teachers, directors, and theatre workshop leaders, this is an incredible teaching tool, accompanied by a CD of demonstrative recordings of vocal exercises and other guiding content sung and spoken by authors Janet B. Rodgers and Frankie Armstrong. Book jacket.

**A Different Voice, a Different Song**

Caroline Bithell 2014-08

The Oxford Handbook of Music and World Christianities Suzel Ana Reily 2016 The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions, music and religious utopias (and other oppositional religious communities), music and conflict, music and transnational flows, and music and everyday life. The volume as a whole, then, approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate (and change) between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply

felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious, moral, and cultural values in a long history of intercultural and transnational encounters.

**Reclaiming William Morris** Michelle

Weinroth 1996 A study providing a theoretical, historical, and exegetical analysis of the impassioned yet decidedly marginal propagandist texts of early 20th century English communists. Weinroth argues that the communists struggled to retain Morris's Englishness while promoting his political doctrine, thereby placing themselves in a paradoxical situation: they could not grip the masses without the aesthetic appeal of Englishness, but Englishness was imbued with the very imperialism they abhorred. Communities of Musical Practice

Ailbhe Kenny 2016-04-28 Every day people come together to make music. Whether amateur or professional, young or old, jazz enthusiasts or rock stars, what is common to all of these musical groups is the potential to create communities of musical practice (CoMP). Such communities are created through practices: ways of engaging, rules, membership, roles, identities and learning that is both shared through collective musical endeavour and situated within certain sociocultural contexts. Ailbhe Kenny investigates CoMP as a rich model for community engagement, musical participation and transformation in music education. This book is the first to produce a valid and reliable

in-depth study of music communities using a community of practice (CoP) framework - in this case focusing on the social process of musical learning. Employing case study research within Ireland, three illustrations from particular sociocultural, genre-specific, economic and geographical contexts are examined: an adult amateur jazz ensemble, a youth choir, and an online Irish traditional music web platform. Each case is analysed as a distinct community and phenomenon offering sharpened understandings of each sub-culture with specific findings presented for each community.

Community Music at the Boundaries Lee Willingham 2021-04-06 Music lives where people live. Historically, music study has centred on the conservatory, which privileges the study of the Western European canon and Western European practice. The Eurocentric way music has been studied has excluded communities that are considered to be marginalized in one or more ways despite that the majority of human experiences with music is found outside of that realm. Community music has emerged as a counter-narrative to the hegemonic music canon: it seeks to increase the participation of those living on the boundaries. Community Music at the Boundaries explores music and music-making on those edges. "The real power of community music," writes Roger Mantie in the foreword, "lies not in the fiction of trying to eliminate boundaries (or pretending they don't exist), but in embracing the challenge of 'walking' them." Contributions from scholars and researchers, music practitioners, and administrators examine the intersection of music and communities in a variety of music-making forms: ensembles, university and police choirs, bands, prison performing

groups, youth music groups, instrument classes, symphonies, drum circles, and musical direction and performance. Some of the topics explored in the volume include education and change, music and Indigenous communities, health and wellness, music by incarcerated persons, and cultural identity. By shining a light on boundaries, this volume provides a wealth of international perspectives and knowledge about the ways that music enhances lives.

A Different Voice, a Different Song Caroline Bithell 2014 Caroline Bithell explores the history and significance of the natural voice movement and its culture of open-access community choirs, weekend workshops, and summer camps. Founded on the premise that 'everyone can sing', the movement is distinguished from other choral movements by its emphasis on oral transmission and its eclectic repertoire of songs from across the globe.

**Community-based Traditional Music in Scotland** Josephine L. Miller 2022-10-07 This book examines the community-based learning and teaching of 'traditional' music in contemporary Scotland, with implications for transnational theoretical issues. The book draws on a broad range of scholarship and a local case study of a large organisation. A historical perspective provides an overview of new educational formats emerging from the mid-twentieth century folk music revival in Scotland. Practices through which participants encounter and perpetuate the idiom of traditional music include social music-making, learning by ear and participatory and presentational elements of musical performances. Individuals are shown as combining these aspects with their own learning strategies to participate in the

contemporary community of practice of traditional music. The work also discusses how experiences of learning contribute to identity formation, including the role and practice of 'tutors' of traditional music. The author proposes conceptualising the teaching and learning of traditional music in community-based organisations as a 'pedagogy of participation'.

Singing Out Heather MacLachlan 2020-12-01 Can you change the world through song? This appealing idea has long been the professed aim of singers who are part of choruses affiliated with the Gay and Lesbian Association of Choruses (GALA). These choruses first emerged in the 1970s, and grew out of a very American tradition of (often gender-segregated) choral singing that explicitly presents itself as a community-based activity. By taking a close look at these choruses and their mission, Heather MacLachlan

unpacks the fascinating historical and cultural dynamics behind groups that seek to change society for the better by encouraging acceptance of LGBT-identified people and promoting diversity more generally. She characterizes their mission as "integrationist rather than liberationist" and zeroes in on the inherent tension between GALA's progressive social goals and the fact that the music most often performed by GALA groups is deeply rooted in a fairly narrowly conceived tradition of art music that identifies as white, Euro-centric, and middle class--and that much of the membership identifies as white and middle class as well. Pundits often wax eloquent about the power of music, asserting that it can, in some positive way, change the world. Such statements often rest on an unexamined claim that music can and does foster social justice. Singing Out: GALA Choruses and Social Change tackles the premise underlying such claims, analyzing groups of amateur singers who are explicitly committed to an agenda of social justice.
