Becoming Qualitative Researchers Corrine Glesne 2006 Offering a comprehensive overview of qualitative research in a user-friendly format, this book provides an excellent harmony between qualitative theory and the practicalities of actually conducting qualitative research. Exercises offer beginning students the opportunity to explore issues inherent in conducting qualitative inquiry as well as to practice and refine the skills of qualitative researchers. The wealth of examples and exercises in the text is exceptional, as is the writing style. - Publisher.

Padre Pio and I Adolfo Affatato 2019-02-13 Adolfo Affatato is one of the last living spiritual sons of St. Pio of Pietrelcina. Recently translated into English, "Padre Pio and I" is the culmination of what he witnessed as he sat by the saint's side for sixteen years. This is not a typical biography by a journalist, friar, or academic; instead, the author presents "the Padre" intimately and personally -- as a father figure who tenderly guided and directed him. This book is filled with riveting new accounts of the mystical side of Padre Pio: from the moment Affatato was called by name by Padre Pio out of a crowd to Padre Pio's characteristic rose-scented fragrance Affatato does not disappoint. Yet, the author's motivation for writing this book is not to boast of supernatural phenomena he was privileged to witness. Instead, it is a response to what Padre Pio once told him some six decades ago: "Give the love that I have put into your heart to those to whom you draw near, because in this is the meaning of life." And Adolfo has spent his adult life responding to that mandate. While most octogenarians spend their final years in repose, Adolfo tirelessly traverses the Italian peninsula giving conferences to audiences of a few dozen or a few thousand. He has spoken to popes, cardinals and countesses and regularly appears on Catholic radio and secular prime-time talk shows alike. And he never accepts a cent for his work; all proceeds for his book sales are donated to a charity. Now for the first time what Adolfo received from Padre Pio is available in English. For those who want to know Padre Pio "more and better" this book is a must read. "This book has touched the heart of Italy; yet, it also touched me. This book can change your life." Andrea Bocelli

Exploring Research Data Management Andrew Cox 2018-05-11 Research Data Management (RDM) has become a professional topic of great importance internationally following changes in scholarship and government policies about the sharing of research data. Exploring Research Data Management provides an accessible introduction and guide to RDM with engaging tasks for the reader to follow and develop their knowledge. Starting by exploring the world of research and the importance and complexity of data in the research process, the book considers how a multi-professional support service can be created then examines the decisions that need to be made in designing different types of research data service from local policy creation, training, through to creating a data repository. Coverage includes: A discussion of the drivers and barriers to RDM Institutional policy and making the case for Research Data Services Practical data management Data literacy and training researchers Ethics and research data services Case studies and practical advice from working in a Research Data Service. This book will be useful reading for librarians and other support professionals who are interested in learning more about RDM and developing Research Data Services in their own institution. It will also be of value to students on librarianship, archives, and information management courses studying topics such as RDM, digital curation, data literacies and open science.

Problems of Democratisation in Indonesia Edward Aspinall 2010 Alternately lauded as a democratic success story and decried as a flawed democracy, Indonesia deserves serious consideration by anyone concerned

with the global state of democracy. Yet, more than ten years after the collapse of the authoritarian Suharto regime, we still know little about how the key institutions of Indonesian democracy actually function. This book, written by leading democracy experts and scholars of Indonesia, presents a sorely needed study of the inner workings of Indonesia...

Optimasi perencanaan produksi pada kombinasi produk dengan metode linear programming Didi Pianda 2018-04-16 Naskah buku ini terbagi beberapa bagian, antara lain; bagian pertama pendahuluan, yang berisikan latar belakang masalah menghantarkan pembaca dalam mengaplikasikan program linear programming. Penulis mengambil kasus pada PT. Ima Mountaz Sejahtera Lhokseumawe, adalah suatu perusahaan yang bergerak dalam industri pengolahan air minum dalam kemasan (AMDK) bermerk MOUNT AQUA dalam kemasan yaitu kemasan 250 ml, kemasan 600 ml, kemasan 1500 ml dan kemasan Gallon (19 liter). Dalam suatu industri adanya kondisi dimana keterbatasan faktor-faktor produksi seperti, bahan baku, tenaga kerja, mesin, modal dan jumlah permintaan mengakibatkan munculnya permasalahan dalam kombinasi produk. Agar mencapai laba yang maksimum maka perusahaan harus menentukan secara tepat jumlah masing-masing jenis produk yang akan dihasilkan, karena setiap jenis produk memerlukan biaya produksi yang berbeda-beda dan akan memberikan keuntungan yang berbeda-beda pula. Untuk menentukan kombinasi produk tersebut akan digunakan metode linear programming. Tingkat permintaan pasar ditentukan dengan melakukan peramalan menggunakan data penjualan produk tahun-tahun sebelumnya. Peramalan dilakukan dengan Software Quantitative System (S-QS) untuk hasil yang lebih cepat, akurat dan teliti. Bagian kedua landasan teori, dimana pada bab ini menjelaskan teori-teori yang diuraikan sebagai referensi dalam penelitian antara lain; perencanaan produksi, peramalan (forecasting), biaya pabrikan, analisa marginal income, dan linear programming. Bagian ketiga metodologi & pengumpulan data, dimana penelitian yang digunakan adalah penelitian kuantitatif dengan pendekatan model permasalahan diformulasikan dalam bentuk matematis linear programming, dengan menentukan variabel keputusan, penentuan dan perumusan fungsi tujuan dan penentuan fungsi pembatas. Data-data diperoleh dengan melakukan observasi, wawancara, studi dokumentasi, dan studi pustaka. Bagian keempat pengolahan data & hasil penelitian. Pengolahan dan analisis data ini menggunakan analisis deskripsi yang bertujuan untuk memberikan solusi yang optimal dari jumlah produksi dan keuntungan (total marginal income).

Pornified Pamela Paul 2007-04-01 "Strips porn of its culture-war claptrap . . . Pornified may stand as a Kinsey Report for our time."—San Francisco Chronicle Porn in America is everywhere—not just in cybersex and Playboy but in popular video games, advice columns, and reality television shows, and on the bestseller lists. Even more striking, as porn has become affordable, accessible, and anonymous, it has become increasingly acceptable—and a big part of the personal lives of many men and women. In this controversial and critically acclaimed book, Pamela Paul argues that as porn becomes more pervasive, it is destroying our marriages and families as well as distorting our children's ideas of sex and sexuality. Based on more than one hundred interviews and a nationally representative poll, Pornified exposes how porn has infiltrated our lives, from the wife agonizing over the late-night hours her husband spends on porn Web sites to the parents stunned to learn their twelve-year-old son has seen a hardcore porn film. Pornified is an insightful, shocking, and important investigation into the costs and consequences of pornography for our families and our culture.

Pālemia Peter Swain 2017 Pālemia tells the story of how a boy from an isolated village grew up to become Prime Minister of Samoa. It follows his journey from Lepa to Apia, Wellington, Brussels, Singapore, Beijing, Tokyo, London, New York and many other international destinations, always returning to Lepa and the Fa'asamoa that shaped him. Tuila'epa Sa'ilele Malielegaoi is Samoa's longest-serving Prime Minister. His premiership has been marked by political and economic crises, natural disasters, regional tensions and local challenges. Tuila'epa's political career started during turbulent times but has resulted in an unprecedented period of political stability and economic development through his leadership in modernising the economy, improving education and health and reducing poverty in Samoa. Pālemia captures the voice, documents the life, and places in context a record of the most significant Samoan political leader of this generation, and contains many useful insights into the social, cultural and economic development of Samoa and the wider Pacific region. 'In collaboration with Peter Swain, a superb conveyer of information, Tuila'epa narrates his entry into politics and his rise to power. The book is a fascinating biography and provides a stimulating, thoughtful, original and authoritative perspective on Samoan political life - from the inside.' --Professor Stephen Levine.

How to Play the Piano James Rhodes 2016-10-06 Learn to play one of Bach's most exquisite preludes in just 6 weeks, even if you have never played the piano before. An accessible and inspiring book by the pianist and international bestselling writer James Rhodes, who promises that it gives anyone with two hands, a piano or an electric keyboard and just 45 minutes a day the tools they need to learn to play Bach's Prelude No. 1 in C Major in 6 weeks, even if they know nothing about music and have never even touched a piano before. How often do we convince ourselves that it's just too late - too late to learn how to ride a bike, too late to know how to meditate, too late to travel the world... As we get older and time slips through our fingers like water, we become resigned, almost defeatist, about abandoning our dreams. For James Rhodes, after the inevitable "How many hours a day do you practice?" and "Show me your hands", the most common thing people say to him when they hear he's a pianist is "I used to play the piano as a kid. I really regret giving it up". Where does this mourned and misplaced creativity go? For Rhodes, it's still there to be tapped into by all of us, at any point. This inspirational book gives us the means to do this, by breaking up Bach's seminal Prelude No. 1 from the Well-Tempered Clavier into manageable segments, teaching us the basics of piano playing - how to read music, the difference between the treble and the bass clef, sharp and flat notes, how to practice etc.. - and encouraging personal interpretation in a way that is guaranteed to soothe the mind, feed the soul and unleash creative powers we didn't know we still had. All of this will culminate in an ability to perform one of Bach's masterpieces. "If listening to music is soothing for the soul, then playing music is achieving enlightenment. It's going from kicking a ball around with a few pals to playing alongside Ronaldo."

Research in Law and Economics Richard O. Zerbe 2007 Written by leading experts in the field, each chapter in this book examines in depth a topic in law and economics. John Connor begins by describing and evaluating the results of his extensive survey of reports of cartel overcharges. Dennis Weisman models the price effects of mergers that not only increase concentration in the relevant market but also increase the merged firms' participation in other, complementary markets. Malcolm Coate and Mark Williams develop a superior method for calculating critical loss in markets that are relatively homogenous and competitive premerger. Zhiqi Chen surveys recent developments in economic theories of buyer power and creates a general framework for antitrust analysis. Finally Thomas J. Miceli and Kathern Segerson, given the difficulty of collecting damages after a long latency period, examine the desirability of granting toxic exposure victims an independent cause of action for medical monitoring at the time of exposure. They show that such a cause

of action increase incentives for injurer care but only at the cost of greater litigation cost and the reluctance of courts to adopt such a proposed cause of action reflect their awareness of this trade-off.

Apostle Tom Bissell 2016-04-05 Peter, Matthew, Thomas, John :Who were these men and what was their relationship to Jesus? Tom Bissell gives us rich and deeply informed answers to those ancient questions. Written with warmth, humour, and a rare acumen, Apostle is a brilliant and exhaustive synthesis of travel writing, centuries of biblical history, and a deep lifelong relationship with Christianity. Bissell explores not just who these renowned and pious men were (and weren't), but how their identities have taken shape over two millennia. Bissell, in his search for this elusive set of truths, has traveled the world, visiting holy sites from Rome and Jerusalem to Turkey, India, and Kyrgyzstan, and he captures vividly the rich diversity of Christianity's global reach. Apostle is an unusual, erudite, and hilarious book, an intoxicating combination of religious, intellectual, and personal adventure.

Nutrition for Sport, Exercise and Performance Regina Belski 2020-07-17 Nutrition before, during and after training or a sporting event can improve the comfort, energy and performance of athletes of all levels, from elite to recreational, as well as providing long-term health benefits. Nutrition for Sport, Exercise and Performance offers a clear, practical and accessible guide to the fundamentals of sport and exercise nutrition. The expert authors begin by explaining key principles, including understanding energy systems, exercise physiology and metabolism. They cover the basics of digestion, absorption and nutrition; examine the key macronutrients and micronutrients essential for performance; and discuss the process of dietary assessment. Part 2 goes on to explore in detail nutrition for pre- and post-training, hydration, the use of supplements and body composition, and provides guidance on developing plans for both individual athletes and teams. The final component examines specific nutrition issues and special needs, including working with elite athletes, strength-and-power athletes, young, older and disabled athletes, endurance sports, GI disturbances and rehabilitation issues. Cultural issues are also explored, including diets for vegan and vegetarian athletes, and religious perspectives and requirements. Featuring contributions from a range of

sport and exercise nutrition professionals and including practical diet plans, diagrams and the latest research and evidence throughout, this is a core reference for undergraduates, nutritionists and trainers.

Strategic Management of Human Capital in Education Allan R. Odden 2011-03-01 Strategic Management of Human Capital in Education offers a comprehensive and strategic approach to address what has become labeled as "talent and human capital." Grounded in extensive research and examples of leading edge districts, this book shows how the entire human resource system in schools—from recruitment, to selection/placement, induction, professional development, performance management and evaluation, compensation, and career progression—can be reformed and restructured to boost teacher and principal effectiveness in ways that dramatically improve instructional practice and student learning. Strategic Management of Human Capital in Education guides educators towards putting more effective teachers, teacher leaders, and principals in the country's schools—especially in poverty-impacted urban and rural communities—equipping those teacher and principals with instructional and leadership expertise, and rewarding and retaining those who are successful in attaining these objectives. Drawing from cases, experiences, and deliberations from a national task force, this book outlines a comprehensive framework for how to transform current human resource management practices into authentic, strategic talent management systems in order to improve student achievement.

Corporate Social Irresponsibility Ralph Tench 2012 Corporate social responsibility (CSR) has become an increasingly heated topic since the 1980s. But there are severe limitations with the concept of CSR and the effectiveness of CSR practices. Addressing such limitations, this volume proposes that the concept of Corporate Social Irresponsibility (CSI) offers a better theoretical platform to avoid the vagueness, ambiguity, arbitrariness and mysticism of CSR. It challenges conventional modes of thinking, unveils the CSR mask of business practices and redirects public attention to the core issues of CSR. This collective work sets up an initial theoretical framework for the subject of CSI and examines the fundamental reasons for irresponsibility in and beyond a corporate context. Rooted in theory and practice it seeks to understand how boundaries of CSR and CSI have been constructed in society, and explores some systemic and structural issues of CSI in practice.

Appalachia and America Allen Batteau 2021-12-14 In this collection of fourteen essays, scholars of Appalachian culture and society examine how the people contend with and adapt to the pressures of change thrust upon them. Appalachia and America will appeal to a broad range of people interested in the southern mountains or in the policy issues of social welfare. It deals cogently with the newest form of conflict affecting not only communities in Appalachia, but urban and rural communities in America at large—the struggle for local values and ways of life in the face of distant and powerful bureaucracies.

The Feeling of Life Itself Christof Koch 2020-09-08 An argument that consciousness, more widespread than previously assumed, is the feeling of being alive, not a type of computation or a clever hack. In *The Feeling of Life Itself*, Christof Koch offers a straightforward definition of consciousness as any subjective experience, from the most mundane to the most exalted—the feeling of being alive. Psychologists study which cognitive operations underpin a given conscious perception. Neuroscientists track the neural correlates of consciousness in the brain, the organ of the mind. But why the brain and not, say, the liver? How can the brain, three pounds of highly excitable matter, a piece of furniture in the universe, subject to the same laws of physics as any other piece, give rise to subjective experience? Koch argues that what is needed to answer these questions is a quantitative theory that starts with experience and proceeds to the brain. In *The Feeling of Life Itself*, Koch outlines such a theory, based on integrated information. Koch describes how the theory explains many facts about the neurology of consciousness and how it has been used to build a clinically

useful consciousness meter. The theory predicts that many, and perhaps all, animals experience the sights and sounds of life; consciousness is much more widespread than conventionally assumed. Contrary to received wisdom, however, Koch argues that programmable computers will not have consciousness. Even a perfect software model of the brain is not conscious. Its simulation is fake consciousness. Consciousness is not a special type of computation—it is not a clever hack. Consciousness is about being.

Told through Mark's eyes, these are stories filled with heart, verve and consequence. In "Tapka," six-year-old Mark's cocky game with a neighbour's beloved dog turns into a tragi-comedy of life lessons learned. In the title story, a teenage Mark faces a stark, comical and ultimately searing introduction to first love at the experienced hands of his cousin, Natasha, an immigrant from the new Russia. And in "Minyan," Mark and his grandfather watch as the death of an Odessan cab driver sets off a religious controversy among the residents of a Jewish old-people's home. Often funny and always wise, this much-celebrated collection captures the immigrant experience with striking wit and deep sympathy.

Choosing for Changing Selves Richard Pettigrew 2020-01-12 What we value, like, endorse, want, and prefer changes over the course of our lives, sometimes as a result of decisions we make--such as when we choose to become a parent or move to a new country--and sometimes as a result of forces beyond our control--such as when our political views change as we grow older. This poses a problem for any theory of how we ought to make decisions. Which values and preferences should we appeal to when we are making our decisions? Our current values? Our past ones? Our future ones? Or some amalgamation of all them? But if that, which amalgamation? In *Choosing for Changing Selves*, Richard Pettigrew presents a theory of rational decision making for agents who recognise that their values will change over time and whose decisions will affect those future times.
