World Investment Report 2020 United Nations Conference on Trade and Development (UNCTAD) 2020-07-15 The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

The Report: Mexico 2014 Oxford Business Group 2014-06-06 The second-largest economy in Latin America, Mexico seems poised to enter a new growth phase as the government of Enrique Peña Nieto implements radical changes in a number of sectors across the economy. The reforms, aimed at raising the competitiveness of the Mexican economy, have the potential to establish Mexico's position as a regional powerhouse. Optimism surrounding the recent wave of reforms, coupled with a stable macroeconomic environment and an improved credit rating from international agencies, has placed Mexico centre-stage. Despite slower than anticipated growth of 1.1% in 2013, a wave of reforms affecting a range of sectors is expected to bring a new dynamism to the economy and continue to attract increasing amounts of foreign investment. A highly anticipated energy reform approved by Congress in 2013 will for the first time in decades open the nationalised oil industry to foreign investment, while a new public-private partnership law is set to provide the climate of legal certainty needed to attract private investment in the myriad of sectors undergoing expansion. While challenges remain, in particular informality and deficient domestic supply chains, growth prospects remain positive for the second-largest economy in Latin America.

Globalization and Labour in the Twenty-First Century (Open Access) Verity Burgmann 2016-04-14 The Open Access version of this book, available at <http://www.tandfebooks.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0

license. Globalization has adversely affected working-class organization and mobilization, increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries, many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances; in developing countries, militant new labour movements are emerging. Drawing upon insights in anti-determinist Marxian perspectives, Verity Burgmann shows how working-class resistance is not futile, as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world, including Greece since 2008, she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working-class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies, globalization, political economy, Marxism and sociology of work.
