[arXiv:2209.03361v1 \[hep-th\] 7 Sep 2022](https://arxiv.org/abs/2209.03361v1)

model, one runs into several paradoxes when compactifying and trying to track the meaning of theta across the duality web. This is a confusing state of affairs, with prior literature being unclear as to whether the Sethi string is part of the Landscape or the Swampland. In this paper we resolve this question { we figure out in which cases there is actually a theta angle and in which ones ...

known that unrestricted language can result in paradoxes. Example: $\{x \mid x \notin x\}$. ("Russell's paradox") -- see the historical notes about it on pp 7-8. The moral: not everything that looks on the surface like a predicate can actually be considered to be a good defining condition for a set. Solutions - type theory, other solutions; we won ...
