Effects of Early Family/Parent Training Programs on Anti-Social Behavior and Delinquency Alex Piquero 2011-01

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-12-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Family and Parenting Support UNICEF Innocenti Research Centre

2015-12-15 In keeping with the spirit of the Convention on the Rights of the Child, family and parenting support is increasingly recognized as an important part of national social policies and social investment packages aimed at reducing poverty, decreasing inequality and promoting positive parental and child well-being. Over the past 15 to 20 years, different models of family-related services have evolved in different parts of the world. Much less documented is what drives the development of national policies and programmes in low- and middle-income countries and how the provision of family and parenting support impacts on child and adolescent well-being in these contexts. The publication aims to build the evidence base on what kind of family and parenting support works, under what conditions and for whom in order to promote child well-being in different national contexts. Case studies are included from: Belarus, Chile, China, Croatia, England, Jamaica, The Philippines, South Africa, and Sweden.

Parenting Young Children Don C. Dinkmeyer, Sr. 2008-01 Offers helpful strategies for parents of children under six.

SOS Help for Parents Lynn Clark 1996-01-01 This second edition of "SOS" provides parents with guidance for handling a variety of common behavior problems based on the behavior approach to child rearing and discipline. This approach suggests that good and bad behavior are both learned and can be changed, and proposes specific methods, skills, procedures, and strategies for parents to use in getting improved behavior from their children. The guide is divided into four sections. Section 1 presents some fundamentals of child behavior and effective discipline. Some of the causes of children's misbehavior are examined as well as ways of increasing good behavior and eliminating bad ones. Section 2 provides advice for implementing the "time-out" method. Section 3 gives suggestions on how to: (1) manage bad behavior away from home; (2) use points, tokens, and contracts; (3) use time-out on two children at the same time; (4) use time-out on a toy instead of the child; (5) handle aggressive and dangerous behavior; and (6) help children express feelings. Section 4 suggests some additional resources for

helping children. Each chapter includes a review of the most important ideas and instructions presented. The book's two appendices include an index of problem behaviors, quizzes and answers for parents, more resources for professionals, and tear-out sheets for parents and teachers. Approximately 60 references are included. A videotape, not available from ERIC, demonstrates the child-rearing rules, and errors to avoid, as well as other child management methods. A printed "Video Leader's Guide" for the training leaders provides objectives, suggested outlines for workshops, and guidelines for discussing the behavior vignettes in the video. Workshop evaluation forms and handouts are appended. A parent audio cassette on how to use "time out" effectively is also part of this multimedia package. (HTH)

Children's needs - parenting capacity

Hedy Cleaver 2011-10-12 This second edition of "Children's needs - parenting capacity" updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing such problems.

Consultation Don Dinkmeyer, Jr. 2015-12-22 The methods presented by Don Dinkmeyer, Jr., Jon Carlson, and Rebecca Michel in Consultation are based on the assumption that problems in the home and classroom result not only from the direct actions of disruptive students, but also from the expectations of teachers and parents. This newly expanded fourth edition continues the tradition of encouraging change in supposed 'problem' children by helping authority figures recognize and alter the part they may play in exacerbating negative behavior. New additions include: two all new chapters on assessment and mindfulness, multicultural and diverse case examples, as well as access to online video sessions that accompany the text.

Case Documentation in Counseling and Psychotherapy: A Theory-

Informed, Competency-Based Approach Diane R. Gehart 2015-02-27

CASE DOCUMENTATION IN COUNSELING AND PSYCHOTHERAPY

teaches counselors and psychotherapists how to apply counseling theories in real-world settings. Written in a clear, down-to-earth style, the text provides a comprehensive introduction to case documentation using four commonly used clinical forms: case conceptualization, clinical assessment, treatment plan, and progress note. These documents incorporate counseling theory and help new practitioners understand how to use theory in everyday practice. Case studies illustrate how to complete documentation using each of seven counseling models. Readers also learn about the evidence base for each theory as well as applications for specific populations. Designed to produce measurable results that have value beyond the classroom, the text employs learning-centered, outcome-based pedagogy to engage students in an active learning process. Its case documentation assignments-created using national standards-help students apply concepts and develop professional skills early on in their training. When students become practicing mental health professionals they can use this book-with its practical overviews of theories, conceptualization, treatment planning, and documentation-as a clinical reference manual.
