Understanding the Life Course Lorraine Green 2016-12-20

Understanding the Life Course provides a uniquely comprehensive guide to the entire life course from an interdisciplinary perspective. Combining important insights from sociology and psychology, the book presents the concept's theoretical underpinnings in an accessible style, supported by real-life examples. From birth and becoming a parent, to death and grieving for the loss of others, Lorraine Green explores all stages of the life course through key research studies and theories, in conjunction with issues of social inequality and critical examination of lay viewpoints. She highlights the many ways the life course can be interpreted, including themes of linearity and multidirectionality, continuity and discontinuity, and the interplay between nature and nurture. The second edition updates key data and includes additional material on topics such as new technologies, changing markers of transitions to adulthood, active ageing, resilience and neuropsychology. This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing, and will provide thought-provoking insight into the wider contexts of the life course for students of psychology and sociology.

Child Development: An Introduction John Santrock 2008-11-21 Thorough. Accurate. Reliable. Engaging. Drugs, Crime, and Their Relationships: Theory, Research, Practice, and Policy Glenn D. Walters 2013-02-15 Surveys administered to high school students, studies carried out on jail and prison inmates, and interviews conducted with substance abusers undergoing treatment all point to the same conclusion: drugs and crime are strongly connected. Why they are connected is less well understood, however. Written for middle to upper-level undergraduate courses on drugs and crime or substance abuse and crime, this book examines the drug-crime connection in a systematic and comprehensive way. *Drugs, Crime, and Their Relationships* covers the entire drug-crime spectrum, starting with a review of drug and crime terminology, classification, theory, and ending with policy implications for prevention, harm reduction, and macro-level management of the drug-crime problem. The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug-crime relationships. As the book proceeds, the boundaries between drugs and crime blur, thus revealing the complex and intimate relationship that links these two behaviors. *Drugs, Crime, and Their Relationships* is divided into four sections. The first section offers an introduction and overview of theories on drugs, crime, and their relationships. The second section explores the relevant research on the biological, psychological, sociological, and static/situational correlates of drug-crime relationships. The third section considers the practical implications of drug-crime connections for the criminal justice system, offender assessment, and treatment programming. The fourth and final section examines the policy implications of the drug-crime relationship in the form of prevention, harm reduction, and society's response to drugs and drug-related crime. Students will enjoy the engaging writing style, instructors will welcome the logical manner in which the text is organized, and scholars will appreciate the comprehensiveness of coverage and the range of citations. Key Features: -Provides a step-by-step breakdown and synthesis of the drug-crime connection. - Organized logically so that a student first progresses through chapters that treat drugs and crime separately, gradually replaced by overlapping discussion of drugs and crime, up until the final section (policy) where the overlap is nearly complete. -Covers core topics, including the history of drugs and crime in America, theories of substance abuse, DSM-IV criteria for substance abuse, antisocial personality disorder, theories of crime, and neurotransmitters and drugs. Also includes discussions on important topics not commonly found in other texts including, meta-analysis, genetics of drug use and crime, drug diversion programs, Prison-based treatment programs for drug offenders, evidence-based intervention, harm reduction, Portuguese and Dutch experiments, and much more. -Pedagogical features: Chapter opening learning objectives and chapter ending summary and critical thinking questions. *List of key words in each chapter.

Human Behavior and the Social Environment, Micro Level Katherine Van Wormer 2017 *Human Behavior and the Social Environment, Micro Level* draws on a resilience model to

explore the dynamics of human behavior across the life span. Biological, psychological, and spiritual dimensions are covered. Illustrations and vignettes from social work, psychology, literature, philosophy, and current events highlight the turning points in our lives. Critical thinking questions are provided. The result is an essential book that bridges theory and practice in accordance with the 2015 Council on Social Work Education (CSWE) standards.

Adolescence John Santrock 2007-11-29 More students learn from John Santrock's *Adolescence* than from any other text in this field. Students and instructors rely on the careful balance of accurate, current research and applications to the real lives of adolescents. This new 12th edition features expanded coverage of emerging adulthood, increased coverage of brain development, integrated and expanded coverage of health and wellness, and a new and improved Visual Assets Database for instructors.

One Without the Other Shelley Moore 2017-02-13 In this bestseller, Shelley Moore explores the changing landscape of inclusive education. Presented through real stories from her own classroom experience, this passionate and creative educator tackles such things as inclusion as a philosophy and practice, the difference between integration and inclusion, and how inclusion can work with a variety of students and abilities. Explorations of differentiation, the role of special education teachers and others, and universal design for learning all illustrate the evolving discussion on special education and teaching to all learners. This book will be of interest to all educators, from special ed teachers, educational assistants and resource teachers, to classroom teachers, administrators, and superintendents.

Psychology For Nurses And The Caring Professions Walker, Jan 2012-05-01 "This beautifully written book ... clearly explains the application of psychological concepts and theories to health and succinctly summarises key issues. Each chapter also provides a series of vignettes capturing the kind of real-life situations health and social care professionals will encounter in their own practice and a set of thought-provoking exercises ... These will be invaluable in developing critical thinking skills and growing the capacity to provide the kind of empathic care which is the heart of person-centred practice" Dr Wendy Cousins, Course Director, University of Ulster School of Nursing, UK "I have recommended earlier editions of this book and now am delighted to say that this latest edition is even better. The authors continue to clearly explain the relevance of psychological theories, models and approaches to nursing care but now, through the use of frequent reflective activities, vignettes and a 'psychosoap' family, students are also highly encouraged to identify how the theory will help them to become the high quality holistic practitioners they desire to be." Anthony Duffy, Nurse Tutor, College of Human and Health Sciences, Swansea University, UK "This new edition embraces innovation in student learning. The use of the 'psychosoap' provides a structure which is meaningful and insightful. The chapter exercises have 'realworld' application and can be used to understand your own and others motivations, beliefs and values. Unlike many psychology texts ... this book offers real 'food for thought' and provides the building blocks which link theory to practice. It will also be a valuable resource for those who like to 'dip in' to a book." Philip Larkin, Professor of Clinical Nursing (Palliative Care), and Joint Chair, University College Dublin and Our Lady's Hospice & Care Services, Ireland "This new edition continues to improve the reader's experience, providing comprehensive insight into the complex subject of psychology. It is user friendly, underpinned by research findings and will enable the reader to apply its concepts personally and professionally. It is a text which is well designed for student use and application and it has employed a number of innovative features ... An excellent resource, which I would highly recommend." Siobhan McCullough, Lecturer, School of Nursing and Midwifery, Queen's University Belfast, UK This bestselling book enables those working in health and social care to learn and apply sound psychological principles in the delivery of excellent, evidence-based, patient-centred care. The emphasis throughout is on the promotion and maintenance of personal well-being and quality of life - for care professionals and those they care for. The new edition features a more engaging and user-friendly format and has been comprehensively revised and updated to reflect the latest psychological knowledge. Psychological principles are also clearly set out and summarised in ways that are easy to read and understand. The fourth edition includes: A unique focus on transferable knowledge and skills applicable in a variety of situations Exercises integrated throughout the text to consolidate learning Examples presented in the form of 'psychosoap' characters drawn from the authors' experiences in research and practice An emphasis on positive psychology and promotion of resilience in the management of stress and negative emotions Reviews of recent advances in cognitive science

and issues related to communication Psychology for Nurses and the Caring Professions is a succinct, readable and relevant introductory text ideal for students and practitioners in health or social care.

Aging and Age Discrimination in Europe Nesrin Oruç Ertürk 2022 The attitudes of societies towards ageism in an aging Europe have now become a social phenomenon. This study, which examines and deals with this phenomenon in various European countries, provides an opportunity to analyze the dimensions of ageism in different contexts. Based on these analyses, the exposure levels of older individuals to ageism in aging societies and the discriminatory attitudes of younger generations have been revealed. The book aims to make contributions to the field of ageism in European countries and contains a brief literature review on ageism and descriptive analyses in country context. As part of the project the project 'WISELIFE: Raising Awareness About Ageism' funded by EU ERASMUS+, this book investigates the concept of ageism in Turkey, Hungary, Poland and Italy. It is an essential resource for institutions working with older people, non-governmental organizations, academic circles dealing with age discrimination, and organizations such as the continuing education centers and lifelong learning centers providing education for older people to understand age discrimination and the situation of this concept in Europe.
