Textbook of Paediatric Emergency Medicine Peter Cameron 2018-06-26 It is now more than ten years since the publication of the first edition of Textbook of Paediatric Emergency Medicine and interest in this specialty continues to grow at a local and international level. Paediatric emergency medicine can be a challenging and difficult area for doctors. Children cannot always communicate their problems verbally, while parents are anxious and the possibility of a missed diagnosis is ever present. Although the principles in managing paediatric patients are the same as adults there are significant differences in patterns of illness and response. In addition, the therapies available vary widely between adult and paediatric practice. Textbook of Paediatric Emergency Medicine provides clear, concise and comprehensive coverage of all the major topics that present within paediatric emergency medicine. It offers a consensus approach to diagnosis and treatment, drawing on the latest evidence available. Short chapters with key point boxes allow for the quick and easy retrieval of information, essential when time is short. This Third Edition captures the major changes in guidelines across the specialty in the assessment and management of paediatric patients, whilst refining established approaches to practice. The text reviews both new technologies and the better application of older techniques which have led to changes in practice. There are significant updates to the sections on resuscitation and trauma, the clinical applications of bedside ultrasound, analgesia and sedation. There is also a new focus on the teaching and research sections.

*Oxford Textbook of Palliative Care for Children* Richard Hain 2021-03-24 Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. **Get Through MRCPCH Part 2: 125 Questions on Clinical Photographs** Nagi Barakat 2005-08-30 Get Through MRCPCH Part 2: 125 Questions on Clinical Photographs tests candidates on the interpretation of photographic material. The text contains 125 cases, with accompanying clinical, radiological and ultrasonic imagery. Each case is explored using the multiple choice, extended matching or single option question approach, which is the format used in the MRCPCH Part 2 examination. Detailed discussion of the cases is provided, which is derived from the current editions of widely used standard reference texts. Trainees in paediatrics intending to sit the MRCPCH Part 2 examination will find this book to be an essential revision aid. The authors, Nagi Barakat and Roger Buchdahl, are both Consultant Paediatricians at Hillingdon Hospital, Uxbridge, and, respectively, hold Honorary Consultant posts in Paediatric Neurology at Great Ormond Street Hospital and Paediatric Respiratory Medicine at the Brompton Hospital, London, UK. Reviews of titles written previously by Nagi Barakat: 400 MCQs in Paediatrics for MRCPCH Part 1 reviewed by Colin M Stern, Consultant Paediatrician "This collection is a valuable addition to the armamentarium of the prospective paediatrician" 100 Grey Cases in Paediatrics for the MRCPCH reviewed in The Archives of Diseases in Childhood "This text provides the revising trainee with realistic and fair clinical conundrums that have much wider applications than in an examination hall. Like any good revision text this collection of cases allows you to forget that you are actually revising and by the end of the book you develop a knack for identifying pertinent information and ignoring the red herrings. I am sure that this will soon appear on many trainees' bookshelves."

Neonatal Nursing Handbook Carole Kenner 2003-05-30 This is a Pageburst digital textbook; Neonatal nurses are faced with a tremendous need for accurate, comprehensive information while in the clinical setting. Kenner and Lott's new book, Neonatal Nursing Handbook is designed to meet these needs by providing accessible information to assist these practitioners in their clinical decision-making and critical thinking. The new book also provides an excellent complementary reference to Kenner & Lott's Comprehensive Neonatal Nursing: A Physiologic Perspective, 3rd Edition. This handbook is organized primarily by body systems and includes a brief definition of the neonatal problem, followed by diagnostic tests and labs, differential diagnosis where

appropriate, and then an algorithm to aid in the decision making process. The overall format is brief outlined and bulleted information wherever possible. An accessible, quick reference handbook to assist neonatal nurses in making sound clinical decisions and to think critically. Consistent format presentation that begins with a brief definition of the problem, diagnostic tests and labs, differential diagnosis where appropriate, and concludes with an algorithm to assist in the decision making process. Builds on the strength of content presented in Kenner & Lott's *Comprehensive Neonatal Nursing: A Physiologic Perspective*, 3e. Chapter 19 focuses on Discharge Planning / Coordination of Home Care to provide the nurse with important patient/family teaching and follow up care considerations for the neonate's condition. Chapter 20 End-of-Life or Palliative Care helps the nurse understand these important and sensitive care considerations.
