Novel Biodegradable Microbial Polymers E.A. Dawes 2012-12-06 The NATO Advanced Research Workshop from which this book derives was conceived during Biotec-88, the Second Spanish Conference on Biotechnology, held at Barcelona in June 1988. The President of the Conference, Dr. Ricardo Guerrero, had arranged sessions on bacterial polymers which included lectures by five invited participants who, together with Dr. Guerrero, became the Organizing Committee for a projected meeting that would focus attention upon the increasing international importance of novel biodegradable polymers. The proposal found favour with the NATO Science Committee and, with Dr. R. Clinton Fuller and Dr. Robert W. Lenz as the co-Directors, Dr. Edwin A. Dawes as the Proceedings Editor, and Dr. Hans G. Schlegel, Dr. Alexander J.B. Zehnder and Dr. Ricardo Guerrero as members of the Organizing Committee, the meeting quickly took shape. To Dr. Guerrero we owe the happy choice of Sitges for the venue, a pleasant coastal resort 36 kilometres from Barcelona, which proved ideal. The sessions were held at the Palau de Maricel in appropriately impressive surroundings, and invaluable local support was provided by Mr. Jordi Mas-Castella and by Ms. Merce Piqueras. Much of the preparatory work fell upon the broad shoulders of Mr. Edward Knee, whose efforts are deeply appreciated. The Organizing Committee hopes that this Workshop will prove to be the first of a series which will aim to keep abreast of a rapidly expanding and exciting area of research that is highly relevant to environmental and industrial interests.

The 71F Advantage National Defense University Press 2010-09-01 Includes a foreword by Major General David A. Rubenstein. From the editor: "71F, or "71 Foxtrot," is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S.

Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists "do for a living." In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the "grey-beards" of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families."

The Impact of Caffeine and Coffee on Human Health Christina Bamia 2019-12-12 The purpose of this Special Issue is to provide a thorough and up-to-date presentation of research investigating the impact of coffee and/or caffeine intake on various health outcomes. We welcome the submission of original research articles and/or systematic Reviews/meta-analyses focusing on several aspects of coffee/caffeine intake in relation to human health. Areas of interest include, but are not limited to, the following topics: - Human clinical trials of coffee or caffeine use in relation to disease or intermediate phenotypes. - Epidemiological studies of habitual coffee or caffeine intake in relation to human health, among the general public, as well as, among special populations (i.e., children, pregnant women, diabetics, cancer patients, hypertensives, etc.) - Mechanisms of action of nutrients and other bioactive components of coffee/caffeine. - Studies integrating genetic or physiological markers of coffee/caffeine intake to investigations of coffee and health.

Basic Field Manual United States. Army. Signal Corps 1939

Field Artillery Manual Cannon Gunnery Department of the Army 2017-08-19 Training Circular (TC) 3-09.81, "Field Artillery Manual Cannon Gunnery," sets forth the doctrine pertaining to the employment of artillery fires. It explains all aspects of the manual cannon gunnery problem and presents a practical application of the science of ballistics. It includes step-by-step instructions for manually solving the gunnery problem which can be applied within the framework of decisive action or unified land operations. It is applicable to any Army personnel at the battalion or battery responsible to delivered field artillery fires. The principal audience for ATP 3-09.42 is all members of the Profession of Arms. This includes field artillery Soldiers and combined arms chain of command field and company grade officers, middle-grade and senior noncommissioned officers (NCO), and battalion and squadron command groups and staffs. This manual also provides guidance for division and corps leaders and staffs in training for and employment of the BCT in decisive action. This publication may also be used by other Army organizations to assist in their planning for support of battalions. This manual builds on the collective knowledge and experience gained through recent operations, numerous exercises, and the deliberate process of informed reasoning. It is rooted in time-tested principles and fundamentals, while accommodating new technologies and diverse threats to national security.

Historical Perspectives on Vulnerability/Lethality Analysis 1999 Commencing in the early 1990s, Mr. James O'Bryon of the Office of the Secretary of Defense (OSD), Operational Testing and Evaluation (OT & E), charged the Vulnerability Lethality Division (VLD) of what is now the U.S. Army Research Laboratory (ARL) to capture in a hard-bound book the art/science of vulnerability and lethality (VIL) analysis. This work has since expanded into the publication of a series of volumes, each dedicated to a particular portion of the VIL community-ground mobile targets, hardened fixed targets, aircraft, etc. As a first step in this mammoth effort, a number of articles were commissioned to be gathered from some of the giants in the history of VIL analysis. These articles gave a foundation from which the writing of the first of the series commenced and are collected in this report with the hope that future generations of VIL analysts will find in them inspiration for their own accomplishments.

Spearhead of Logistics Benjamin King 2016-02-25 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

Wolf Camp Andrea Zuiill 2016-05-03 Meet Homer, a dog who heads to camp to live like a wolf! Here's the perfect book for the legions of kids out there who love dogs and funny books. Homer is a dog . . . but he also secretly fancies himself part wolf. So when an invitation to attend WOLF CAMP ("Where every dog can live as a wolf for a week") falls out of his kibble bag one morning, he's determined to go. After his people finally agree, Homer boards the bus bound for Wolf Camp, along with fellow campers Trixie and Rex. They're greeted on the other end by wolf counselors Fang and Grrr ("they seem nice"), and what follows is an array of wolf activities, including learning to howl, mark, and hunt. Of course, Homer's a little homesick at times, and the food isn't very good, but that just makes heading home all the sweeter. Perfect for all those kids anticipating camp themselves, Zuiill's debut introduces a charmer of a dog and puts him in some laugh-out-loud scenarios.

Review of Truck Characteristics as Factors in Roadway Design Douglas W. Harwood 2003

Simple Oriental Cookery Peter Pauper Press 2012-10-25 Carpe Kitchen! The door of the Peter Pauper vault

has swung open to release our legendary old-school cookbooks...for your e-reader! Travel back to a mid-century American kitchen and experience global cuisines with this compendium of adaptive twists on Chinese, Japanese, Hawaiian, Indonesian, and Indian dishes. Tuck into a bowl of rich Almond Chow Mein, or a brisk Hawaiian Papaya Freeze on a hot summer day. For a subtle balance of savor and sweetness, whip up Duck and Pineapple Cantonese. You'll find that Japanese Sweet Fritters don't last long on the table...if they make it out of the kitchen at all. If heat doesn't daunt you, try your hand at Shrimp or Chicken Curry. Artist Ruth McCrea's vintage illustrations infuse pages with sixties flair. "From China, Hawaii From the Far-and Near-East, We bring you these dishes On which you can feast."
